10-7H-1: DEFINITIONS:

As used in this article, the following terms have the meanings ascribed to them, unless the context requires otherwise:

DESIGN GUIDELINES: Documentation that is submitted with an application for PC district zoning and that identifies in the proposed PC district the requirements and standards for residential densities, building height, bulk and setback requirements by land use type, signage, landscaping, parking, open space, site plan review procedures, and procedures for modifying the planned community program.

DEVELOPMENT PLAN: A map or maps that are submitted with an application for PC district zoning and that identifies in the proposed PC district general land use designations, transportation plans, open space, and community facilities.

PLANNED COMMUNITY PROGRAM: The development plan and design guidelines that are submitted with an application for PC district zoning. (Ord. 2-01-2002, 2-5-2002, eff. 2-5-2002)

10-7H-2: PURPOSE:

- A. The planned community (PC) district is established to permit and encourage the development of comprehensively planned communities, with a minimum of eight hundred (800) contiguous acres of land under one ownership or control, which can flourish as unique communities as a result of the comprehensive planning required for this size of development. The reclassification of property to the PC district is appropriate only if the planned community program, with respect to such property, will accomplish the objectives set forth in subsection C of this section.

- B. The PC district designation is intended to permit a greater amount of flexibility to the developer of a planned community because of the extended period of time necessary for

development. The PC district regulations are intended to provide to the developer, and its successors and assigns, the rights described herein and to expressly set forth the procedures for obtaining review and approval of zoning and related site plans. The PC district regulations are also intended to provide opportunity and incentives to the developer to achieve excellence in physical, social, and economic planning.

C. In order for property to qualify for PC district zoning, the master developer, including its successors and assigns, must demonstrate the potential for achievement of the following specific objectives throughout the planning, design, and development stages:

1. Providing for an orderly and creative arrangement of land uses with respect to each other, to the entire planned community, and to all adjacent land;
2. Providing for a variety of housing types, employment opportunities, and commercial services to achieve a balanced community for families of a wide variety of ages, sizes, and levels of income;
3. Providing for a planned and integrated comprehensive transportation system for pedestrian and vehicular traffic, which may include provisions for mass transportation, roadways, bicycle or equestrian paths, pedestrian walkways, and other similar transportation facilities;
4. Providing for cultural, educational, medical, religious, and recreational facilities;
5. Locating and siting structures to take maximum advantage of the natural and manmade environment and to provide view corridors; and
6. Providing for adequate, well located, and well-designed open space and community facilities. (Ord. 2-01-2002, 2-5-2002, eff. 2-5-2002)

10-7H-3: DESIGN GUIDELINES:

Development in the PC district may consist of any use or combination of uses that are specifically approved for the property in the planned community program. The developer shall include in the planned community program a listing of the uses proposed and the general arrangement thereof for each land use category within the proposed PC district. The listing and general arrangement of the approved land uses shall be shown in the planned community program that is adopted as part of the PC district approval. (Ord. 2-01-2002, 2-5-2002, eff. 2-5-2002)

10-7H-4: DENSITY:

The number of dwelling units permitted per gross acre in the PC district shall be determined at the time the planned community program is approved. The approved planned community program shall establish the maximum number of dwelling units per gross acre for each

residential category, as well as for the entire property. (Ord. 2-01-2002, 2-5-2002, eff. 2-5-2002)

10-7H-5: MINIMUM SITE AREA FOR RECLASSIFICATION:

The minimum site area that is eligible for reclassification to the PC zoning district is eight hundred (800) acres. Additional tracts which contain less than the minimum site area and which are contiguous to property previously zoned PC may also be zoned PC by the city council if they otherwise qualify for the PC zoning designation. The reclassification of any such additional property shall be made subject to an approved planned community program applicable to that property. (Ord. 2-01-2002, 2-5-2002, eff. 2-5-2002)

10-7H-6: PRESUBMISSION CONFERENCE; REZONING APPLICATION REQUIREMENTS:

- A. Before submitting an application for PC district zoning, the prospective developer, or its authorized representative, shall engage in a presubmission conference with the staff of the city to discuss preliminary land planning, including land use relationships, residential density, transportation systems, community facilities, and landscaping and open space provisions.
- B. Plans and documentation which must accompany a rezoning application are as follows:
1. A development plan for the property, including general land use designations, transportation plans, and plans for open space and community facilities. A general phasing plan shall be included to indicate the intended timing of development;
 2. Design guidelines that set forth densities, building height, bulk and setback requirements, requirements for signage, landscaping, parking, and open space; and procedures for site plan review, modification, and deviation from the planned community program;
 3. Storm drainage information, which shall consist of a preliminary drainage study completed by a registered professional engineer on a map with a minimum contour interval of two feet (2');
 4. Conceptual utility layout that includes tentative sewer and water main corridors;
 5. Proposed conditions, covenants, and restrictions, including design guidelines; and
 6. Culinary and secondary water plan including source, type, and quantity of water shares or rights. (Ord. 2-01-2002, 2-5-2002, eff. 2-5-2002)

10-7H-7: REVIEW, RECOMMENDATION, AND APPROVAL:

- A. The initial zoning approval of a PC district shall consist of a review and recommendation by the planning commission and approval by the city council, in accordance with the provisions of this title. The approval of a PC district by the city council shall be accomplished directly by ordinance and shall include the approval and adoption of a planned community program. An approved planned community program shall be a matter of record and shall be made available in the city offices.
- B. The developer, and its successors and assigns, may develop property in the PC district in accordance with, but only in accordance with, the approved planned community program and any approved modifications thereto or deviations therefrom. No modification or deviation shall be effective unless and until it is approved in accordance with subsection C of this section and the procedures set forth in the planned community program. The city planner may request modification of a program in accordance with the modification procedures set forth in the program.
- C. A planned community program shall contain procedures to provide for modification of and deviation from the program pursuant to review by the development review committee, the planning commission, and the city council, and such procedures shall be exclusive of any other procedure, other than the procedures for notification of public hearings, that is provided in this title for the approval of any reclassification, variance, or conditional use permit. Modification or deviation may be approved only upon a finding by the planning commission or city council, as the case may be, that:
1. The requested modification or deviation, if approved, will not affect the rights of property owners or residents within the PC district to maintain and enforce previously approved conditions, covenants, and restrictions and other rights in the planned community program; and
 2. The requested modification or deviation, if approved, will be consistent with the planning objectives and goals of the approved planned community program. (Ord. 2-01-2002, 2-5-2002, eff. 2-5-2002)

10-7H-8: SUBMISSION AND APPROVAL REQUIREMENTS:

Project approvals required by the city, according to chapter 19 of this title, to comply with this article shall be submitted and reviewed by city bodies in accordance with city subdivision and site plan review procedures. Any submittal requirements under this zone, which are above and beyond the city's typical application standards, shall still apply. (Ord. 06-04-2010, 6-16-2010, eff. 6-17-2010)
